and in said second step applying at least one dyestuff or a dyestuff mixture selected from at dyethe group consisting of the dyes of the formula (I) or (II) or (IIIa) or (IIIb) or (IV) or (V) or (VI) or (VII) or (VIII) or (IX) or (X) or (XI) with the proviso that the dyestuff or mixture of dyestuffs in the second step is not the same dyestuff or mixture of dyestuff as selected in the first step.

2. (Currently Amended) A printing process showing no catalytic fading when the dyestuff or a dyestuff mixture of the first and the second and the third step are brought in contact on a substrate and having a common overlapping area on said

substrate-according to claim 1 characterized in that infurther comprising a third step a comprises of applying at least one dyestuff or a dyestuff mixture selected from at dye of the formula (I) or (II) or (IIIa) or (IIIb) or (IV) or (V) or (VI) or (VII) or (VIII) or (IX) or (X) or (XI) with the proviso that the dyestuff or mixture of dyestuffs in the third step is not the same dyestuff or mixture of dyestuff as selected in the first step or in the second step.

- 3. (Currently Amended) A printing process showing no catalytic fading according to claim 1 or 2 characterized in that wherein the printing process is a polychromatic printing process for printing recording materials.
- 4. (Currently Amended) A printing process showing no catalytic fading according to claim 1 or 2 characterized in that wherein a hydroxy group containing substrates are substrate is printed.
- 5. (Currently Amended) A printing process showing no catalytic fading according to claim 1 or 2 characterized in that wherein the printing process is a an ink jet printing process
- 6. (Currently Amended) A printing process showing no catalytic fading according to claim 1 or 2 characterized in that wherein the total content of salts is less than 0.5% by weight, based on the total weight of the dyes.
- 7. (Currently Amended) Use of composition A method for a printing recording materials material by the inkjet printing process, comprising the step of printing the recording material with a composition including:
- 1) at least one dye of the formula (I) or (V) or (VI) or (VIII),

$$\begin{array}{c|c} & & & & & & & & & \\ & & & & & & & \\ & & & & & & \\ & & & & & \\ & & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & \\ & & \\ &$$

with a being from 4 to 0 and b being from 0 to 4 with the proviso that the sum of a + b does not exceed 4 and c is from 1 to 2

- 2) water or a medium including a mixture of water and an organic solvent, an anhydrous organic solvent or a solid having a low melting point,
- 8. (Currently Amended) Use The method according to claim 7 characterized in that wherein the composition used according to claim 7 has a total content of salts less than 0.5% by weight, based on the total weight of the dyes.
- 9. (Currently Amended) Use The method according to claim 7 characterized in that wherein the recording material is selected from the group consisting of paper and papery substrates, textile fibre materials and plastic films and plastic transparencies comprising hydroxy groups are printed.
- 10. (Currently Amended) Use according to any of the claims 7 characterized in that the printing process is a ink jet printing process A recording material made in accordance with the method of claim 7.
- 11. (New) An article printed in accordance with the process according to claim 1.

- 12. (New) A composition for printing recording material by the inkjet printing process, comprising:
- 1) at least one dye of the formula (I) or (V) or (VI) or (VIII),

$$\begin{array}{c|c} & & & & & & & & & \\ & & & & & & & \\ & & & & & & \\ & & & & & \\ & & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & & \\ & \\ & & \\$$

with **a** being from 4 to 0 and **b** being from 0 to 4 with the proviso that the sum of **a** + **b** does not exceed 4 and **c** is from 1 to 2

2) water or a medium including a mixture of water and an organic solvent, an anhydrous organic solvent or a solid having a low melting point.
